Spur is now empowering creators to supercharge engagement and earn organically We've just partnered with Imperfect University, diving into an exciting mission to help creators from fitness gurus to mindfulness experts - maximize their reach and impact.

Take a peek at what this can do: One health and nutrition content creator, averaging 5k views per reel, skyrocketed to 93.2k views by simply integrating Spur's automation. They invited followers to comment 'Avoid' for tips on foods that hinder fat loss, and got 15k comments, turning a simple interaction into massive engagement!

Not only that, because of this engagement and value that they so easily provided to their audience, they got 5k new followers and 2 new paid clients

Here's the post, you can comment and experience the automation yourself on this post.

This initiative is all about using our proven solutions to boost creators' growth.

How was this achieved? Let's see

Instagram Comments To DM

1. Automate: Automatically Reply to Comments with DM

Instagram allows you to reply to comments with a private reply in the user's DM. This opens up many possibilities for you to share more content and engage with your audience.

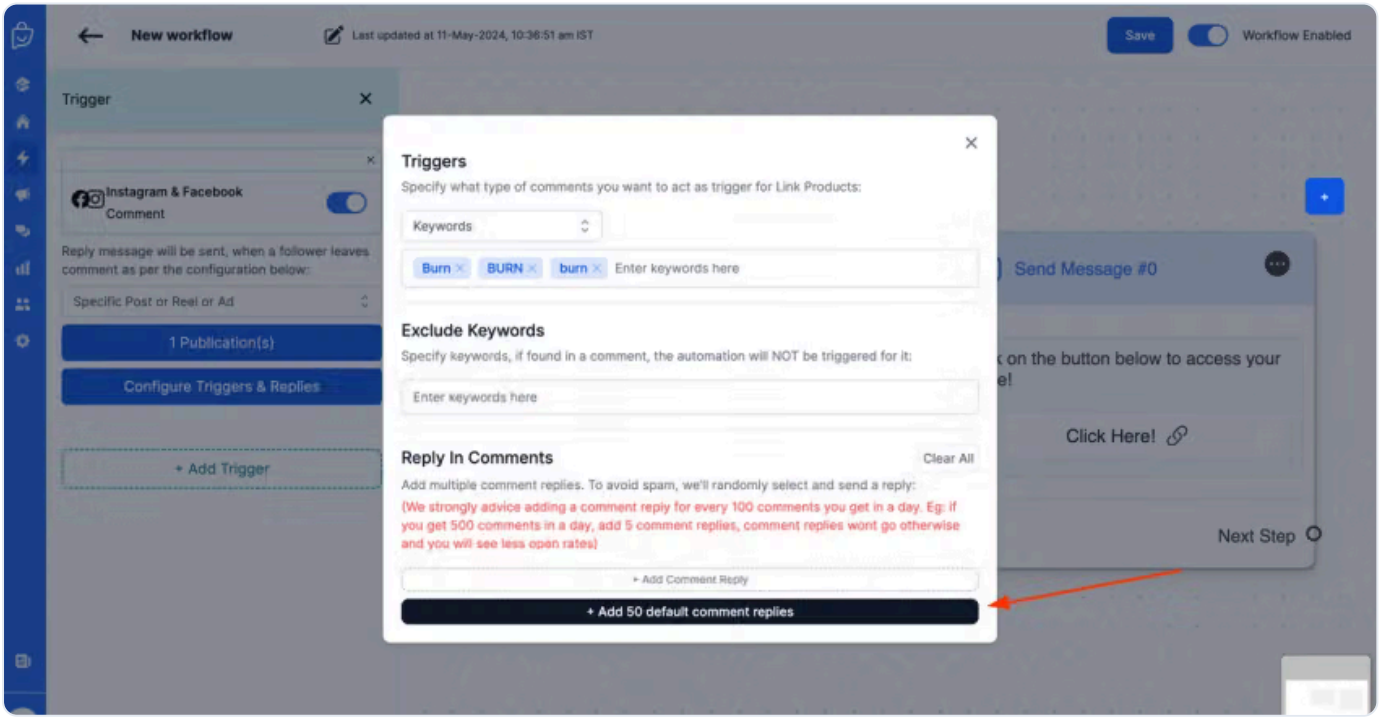

How comment automation looks like in Spur

2. Engage: Reply to the comments with a reply (without spamming)

When you use such an automation, the DM lands in the requests section of your audience (if they don't follow you).

And we know that folks don't ever check that! To mitigate this, you can also automatically reply to the comments themselves, to notify folks to check their DMs.

To make your work even easier, Spur has a button to automatically add 50 unique replies so that your comments aren't marked as spam by Instagram!

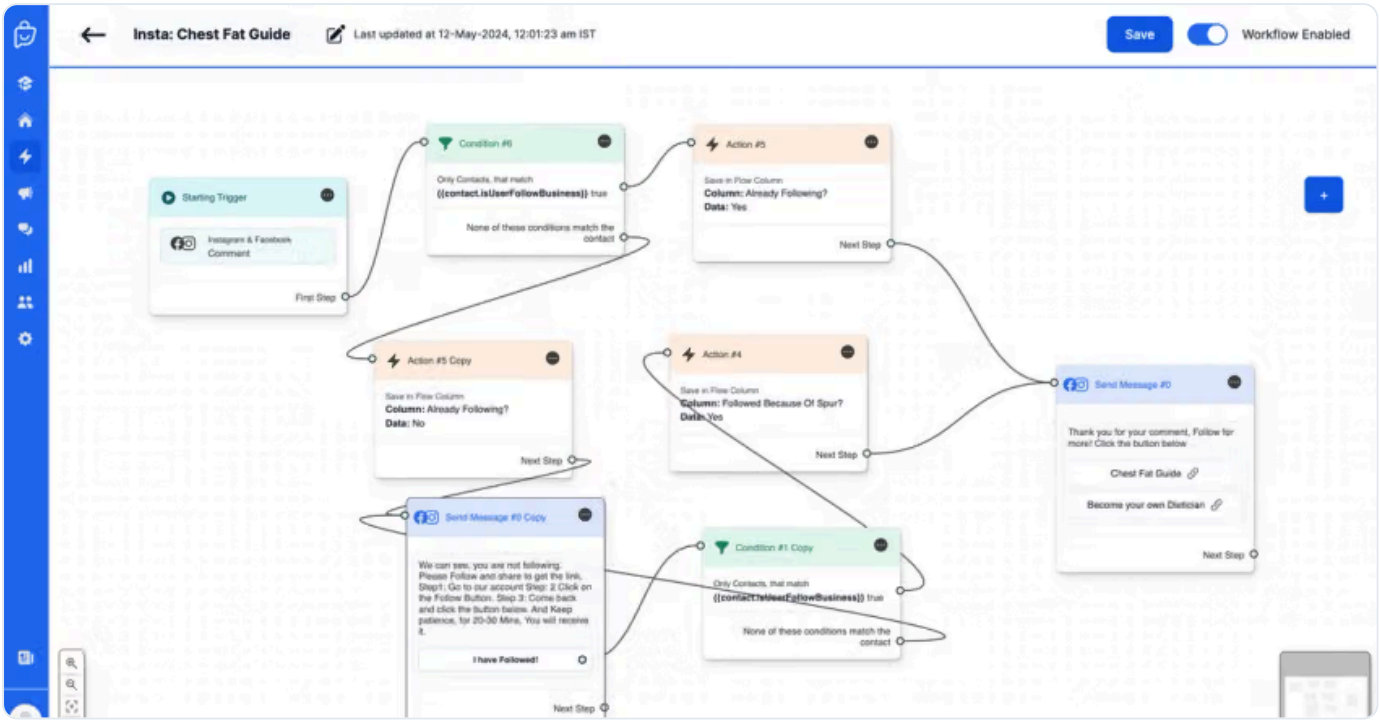

Setup Keywords and reply to comments to notify folks to check their DM

3. Grow: Increase your followers with a simple trick

Now if you're sharing tricks, guides or some other valuable information with your audience, why not also ask to follow them.

This is also possible with Spur, we have a variable that allows you to check if a user is following you or not. If they don't, just ask them to follow before you give the value!

Before giving the link, ask them to follow.
